

Family Service Report October, 2009

The few families that have been slow on getting their hours are working harder on them. One of the families is willing to work for their house without getting SHIP funds. He got a raise and he is over the income level. The other family will take a cut in hours so she can get the funds.

Barb did a presentation on the Expense Debt Ratio sheet. She explained how she figured it out and the questions she asked the families.
